1. Farmingdale having less then 4000 residents has not voted to adopt any of the international building codes required in municipalities with over 4000 residents.

2. Another reminder regarding occupied structures in Farmingdale being constructed at present time; adequate steps must be taken to avoid Fire or the spread of Fire when structure work is being done.

3. All occupied buildings with attached garages – either beside the occupied living space or below the living space must have a one hour rated separation between the living area and the garage area. The present storage of gasoline and other flammable liquids requires the above listed fire rated construction to be installed.
